

## PRODUCT SPECIFICATION SHEET

# XL COMPRESSOR OIL 220

Meets or exceeds the requirements of:

- DIN 51506 (VBL, VCL, VDL)
- ISO / DP 6521 (DAA, DAB, DAG, DAH)
- ISO 6743-3A-DAH

For use in the following compressors, particularly those requiring non-zinc anti-wear oils:

- Rotary sliding vane compressors – oil flooded or oil injected, single or two-stage compressors operating at pressures of up to 10 bar and with air discharge temperatures of up to 100°C;
- Screw air compressors – oil flooded or oil injected, single or two-stage compressors operating at pressures of up to 20 bar and with air discharge temperatures of up to 100°C.
- Circulations systems.
- Oil lubricated plain and rolling element bearings.
- Enclosed spur, helical, bevel & worm gearboxes where a non-additive mineral oil is approved by the gear manufacturer.
- May be used in industrial applications where loadings and temperatures are moderate.
- Hydraulic systems of certain deck cranes.
- Hydraulic systems containing silver plated components.
