

PRODUCT SPECIFICATION SHEET

XL NEATCUT 'D' NEAT CUTTING OIL

Neatcut 'D' is a heavy, transparent, active, non-emulsifying, high additive EP cutting oil for use on ferrous metals, stainless and nickel/chrome steels, blended to suit customer requirements, usually as an ISO 46 oil but can be specially made to ISO 68 on application.

This product is mainly confined to uses where a high viscosity oil is required. Pipe threading by hand or machine are typical applications. Neatcut 'D' can also be used on stainless and nickel / chrome steels. It is suitable for machining steels in various types of lathes – automatics, turrets and hand screw machines.

Being high in additive it is generally used on heavy duty operations such as gear cutting, broaching, turning, threading and tapping.
