

PRODUCT SPECIFICATION SHEET

XL HEAT TRANSFER OIL 22

Meets or exceeds the requirements of:

- DIN 51522

Recommended for use in both closed and open industrial heat transfer systems used in chemical and process plant where the oil is circulated at atmospheric pressure through a pumped system to deliver high temperature continuous heat transfer, according to the following bulk oil temperature maximums:

- Closed system, to a maximum of 320°C
- Open system, to a maximum of 180°C
