

PRODUCT SPECIFICATION SHEET

XL NEATCUT FORGING OIL 46

Neatcut Forging Oil is transparent, active, non-emulsifying, high additive EP cutting oil for use on ferrous metals, stainless and nickel/chrome steels, blended to suit customer's requirements, usually as ISO 46 oil.

This product is mainly confined to uses where a high viscosity oil is required. Pipe threading by hand or machine are typical applications. Neatcut Forging Oil can also be used on stainless and nickel / chrome steels.

Being high in additive it is generally used on heavy duty operations such as gear cutting, broaching, turning, threading and tapping.
