

PRODUCT SPECIFICATION SHEET

XL NEATCUT 'H' NEAT CUTTING OIL

Neatcut 'H' is a low viscosity, inactive type transparent cutting oil recommended for repetition work on high speed single head automatic lathes.

- provides exceptional penetration into the cutting zone, necessary for an excellent work finish.
- provides cutting tools with extra bite necessary during short term contact periods of small automatics cutting cycle.
- designed for machining non-ferrous metals such as aluminium, brass and low tensile bronze.
- has no risk of staining of non-ferrous metals.
- can serve as both a machine lubricant and as a cutting oil.
